About This Game

Story

A freshly graduated Militia soldier comes home to find his house burned to the ground. As he begins to investigate, he finds out that someone is setting fire to houses all over the region. But the real truth behind the fires is dire and it turns out that the safety of the whole world is at stake.

The game is set in the magical, lore-rich world of Nebezem, as known from the previous episodes.

Gameplay

-
- 8 playable classes, ~100 different battle skills
 - Over 40 types of enemies to fight
 - Over 150 different equippable items
 - 20 side quests
 - 24 hours of gameplay (12 with the first party of heroes)
 - Strategic battles

Title: Tales of Nebezem RPG: Red Peril
Genre: Adventure, Indie, RPG
Developer:
GrayTower
Publisher:
GrayTower
Release Date: 15 Mar, 2019

b4d347fde0

English

The game is pretty short and I think there are some balancing issues that make it a bit more of a tedious grind. I really enjoyed playing the game. The graphics are great. The dialogue was a little difficult to get into, but it wasn't bad. The soundtrack is very good!. I usually wait to finish a game before I give it a review, but I thought I'd make an exception since this is a long game and it doesn't have any reviews yet. I will update my review once I've finished the game.

Tales of Nebezem is a great series of adventure games on Kongregate. This is the second of two premium games in the series. The first, Elemental Link, was a story driven adventure game which strangely had less of an emphasis on puzzles than the Kongregate games, but it still served up an interesting story to which this is a close sequel. You will be interested in the plot of this game if you've played Elemental Link.

So far the game is about one of the gray people from the end of the previous game who works as a guardsman and whose house was burned down by an unknown arsonist. You quickly find out that the same thing has happened to other people and you take up the culprit's trail. Interestingly, for both the main character and the first two companions you are given a choice between two options. I'm not sure how much difference this makes to the overall plot, but it makes a lot of difference to the dialogue. I think that probably in the long it will make the whole game replayable at least one time.

The gnomes are back, and this time they are particularly interested in what's making wildlife attack everyone who comes near which brings us to what makes this game different from the others in the series: the addition of combat. The combat is turn based without positioning and reminds me of earlier Final Fantasy titles. I'm not a big fan of this style of combat and I wouldn't be playing this game if I wasn't invested in the series. It just feels like you do the same thing over and over again in every fight. However, the magic system is interesting with different schools of magic working better against different enemies. If your character isn't magic, you have skills that you can use like spells but that require you to be attacked by the enemy so taunt is more useful in this game than in any other similar game I've played. I think if you like this sort of combat this game should be different enough to appeal to you. I just long for a world where grind was a thing of the past.

I haven't seen a lot of puzzles yet, which is disappointing, but I have hopes they are coming. The main reason to play this game so seems to be the story, and the interesting characters inhabiting the world. I sure hope the robot from the most recent of the Kongregate games shows up soon. :)
